

3rd Grade Science Worksheet

Food Chains

Name: _____

Date: _____

1. What Is a Food Chain?

A **food chain** shows how energy moves from one living thing to another.

Complete the food chain:

 Grass →  Rabbit →  Fox

The rabbit eats the _____.

The fox eats the _____.

2. Choose the Correct Answer

1. Which is a producer?
 - ☐ A. Grass
 - ☐ B. Rabbit
 - ☐ C. Fox
2. Which animal is a consumer?
 - ☐ A. Grass
 - ☐ B. Rabbit
 - ☐ C. Sun
3. Where does most energy in a food chain begin?
 - ☐ A. The Moon
 - ☐ B. The Sun
 - ☐ C. The Soil

3. Complete the Food Chain

Use these words:

mouse • grass • snake • hawk

 _____ →  _____ →  _____ →  _____

4. True or False

1. _____ Plants are producers.
2. _____ Animals get energy by eating food.
3. _____ The Sun provides energy for plants.
4. _____ A food chain can show how living things depend on each other.

5. Think Like a Scientist

Imagine that there were no plants in an ecosystem.

What might happen to the animals that eat plants?

★ Challenge

Create your own food chain with **at least 4 living things**.

★ Keep exploring, scientist!
